

The international medical conference on aesthetic medicine and anti-aging, "AMWC Japan," will be held at the The Prince Park Tower Tokyo on November 8th (Saturday) and November 9th (Sunday).

AMWC (Aesthetic and Anti-Aging Medicine World Congress), first held in France in 2002, has now expanded to over 10 locations worldwide including Monaco, Dubai, Taiwan, and China. AMWC Japan, one of these prestigious events, was first hosted at the International Forum in 2022, and this year marks its fourth edition at the Prince Park Tower Tokyo in 2025.

This year, over 100 speakers from more than 25 countries will present at the congress. Speakers will join us from neighboring countries such as Korea, China, Thailand, and Indonesia, as well as from distant regions including Brazil, Canada, UAE, France, and Italy. The essence of AMWC Japan lies in the opportunity to experience cutting-edge international techniques and presentations while in Tokyo.

The sessions are broadly divided into two main themes: Aesthetic Medicine and Anti-Aging.

In the Aesthetic Medicine section, physicians from various countries will share their cutting-edge insights. We are particularly excited to welcome six renowned speakers from Korea who will delve deeply into trending topics, including needle-free injectors that are currently gaining significant attention. Their presentations offer a valuable opportunity to learn about the latest innovations and techniques in Korea's aesthetic medicine field. In the Anti-Aging section, we will once again host our regular sessions on "Regenerative Medicine" and "Hormone Wellness" that have become a tradition.

Additionally, as the importance of longevity clinics has rapidly increased and epigenetic clocks are being more widely used, this year we will feature a special session titled “Clinical Realities in Anti-Aging Treatment: Current Practices and Evaluation Standards” During this session, renowned domestic and international speakers will present the latest insights on dietary and exercise therapies that can be easily incorporated into daily life.

Based on feedback from last year’s participants regarding the increasing number of gynecological inquiries and requests at clinics, including intimate zone concerns, we are introducing gynecology sessions for the first time. On the second day, November 9th, in the afternoon, we will hold two sessions: “Towards Comfort in Feminine Intimate Areas” and “Mastering Estrogen is Key to Beauty”

All sessions will be simultaneously interpreted in Japanese and English.

We look forward to welcoming you to AMWC Japan as a global platform for new knowledge and information exchange.

Scenes from the "AMWC Japan" held in November 2024

Event Overview

- Name: AMWC Japan
- Date: November 8th (Saturday) and November 9th (Sunday), 2025
- Venue: The Prince Park Tower Tokyo (4-8-1 Shibakoen, Minato-ku, Tokyo 105-8563)
